EDUCATION

B.Tech — AI & ML

Lateral Entry · 2nd Year

JSPM University, Pune
2025 – 2028 · CGPA 8.7

Diploma — AI & ML

K.K. Wagh Polytechnic, Nashik
2022 – 2025

CORE SKILLS

PRIMARY

Python · Edge AI · Agentic Systems

ML / DL

PyTorch · Computer Vision · NLP · Scikit-Learn · TensorFlow · NumPy / Pandas

INFRA & TOOLS

Ollama · Playwright · REST APIs · Git · C/C++ · Power BI

CERTIFICATIONS

AWS Certified ML – Specialty
AWS · 2024

Machine Learning with PyTorch
IBM · 2025

Build an AI Agent
IBM · 2026

AWS Educate – Generative AI
AWS · 2026

Git & Java Training
IIT Bombay · 2024-25

LANGUAGES

English
Professional

Marathi
Professional

Hindi
Professional

PROFILE

AI & ML Engineer focused on on-device LLM systems and agentic AI pipelines, with hands-on experience building production-grade ML workflows and autonomous agents. Strong emphasis on edge AI, real-time inference, and scalable deployment — with projects spanning Android-based LLM execution and real-time computer vision systems built independently.

EXPERIENCE

Syntecxhub · Remote

AI Intern — Feb 2026 – Mar 2026

- Built and integrated AI-driven modules into the core product stack, cutting manual intervention across two key production workflows.
- Designed model deployment and orchestration flows within production-grade pipelines.

Data Science Intern — Jan 2026 – Feb 2026

- Engineered end-to-end data pipelines and feature workflows on large-scale structured datasets.
- Delivered analytics models benchmarked against business KPIs; findings adopted in BI reporting.

V Analytics

Machine Learning Intern — Jun 2024 – Oct 2024

- Built end-to-end NLP emotion classification system on a 68,000-row real-world text corpus, achieving **92% model accuracy**.
- Deployed trained model to a live web interface via REST API; integrated into client-facing product.
- Ran full EDA and feature engineering pipeline (Pandas, NumPy); results shipped in client deliverables.

ACHIEVEMENTS

1st — National-Level Hackathon Winner
Sanjivni University · 2025

1st — Paper Presentation Winner
2025

2nd — State-Level Hackathon Runner-Up
Jondhale Polytechnic · 2025

TECHNICAL AREAS

AI / ML

On-Device Inference · NLP · Computer Vision · Model Fine-tuning · Neural Networks

FRAMEWORKS

PyTorch · TensorFlow · Scikit-Learn · Ollama · Playwright

PROJECTS

Autonomous On-Device AI Agent

Edge AI · On-Device LLM

Cross-platform autonomous agent (Android & Windows) running locally via Termux and Ollama — zero cloud, zero API cost. Serves Gemma 3 4B with persistent memory across sessions. Implements 8+ tool integrations: file management, hardware control via Termux:API, WhatsApp automation, steganography, WiFi file transfer, and web search.

↗ Gemma 3 4B fully on-device · 8+ integrated tools · Android & Windows

Python · Ollama · Gemma3-4B · Termux · Termux:API · Android · Windows

Multi-LLM Browser Automation Pipeline

5-Layer Pipeline

Agentic browser automation system with a 5-layer LLM architecture: intent parsing → task planning → orchestration → vision observation → execution. Persistent Playwright sessions, vision LLM observer for page understanding, and NVIDIA API backend. Designed for platforms where conventional APIs are unavailable.

↗ 5-layer LLM pipeline · vision observer · persistent browser sessions

Python · Playwright · NVIDIA API · Vision LLM · LLaMA

Plant Pathology Classifier

AgriTech · CNN

CNN-based image classifier identifying tomato plant disease from leaf imagery. Trained on labeled agricultural dataset for early-stage pathology detection and intervention.

Python · PyTorch · CNN · Image Classification
